## About This Game

### **A narrative adventure in a Dutch countryside villa**

In the summer of 2079, you are sent to the home of Robert-Paul den Heer, a billionaire CEO who is recently deceased. As you approach the lavish villa, your boss calls to remind you of your task: secure Mr. Den Heer's latest research. Hubert, the house AI, has been informed of your arrival and will assist you in retrieving the files. This job will be easy.

Except it's not.

Hubert discovers that his programming has been tampered with, preventing him from even allowing you into the office. Soon, you find yourself going through personal items in an attempt to find, well, something - anything that may grant you access to the files.

As you dig deeper, you slowly piece together a series of events that shaped Mr. Den Heer's past, our present... and more.

## Features

### **A Rich Story**

Explore a richly detailed modernist villa, fully realized in stunning 4K graphics. Interact with Hubert and open doors and drawers to uncover the story of a driven entrepreneur-inventor and the events that made him who he was.

### **A Vision of the Future**

---

Experience a vision of the future where artificial intelligence and augmented reality have replaced most electronic devices we use today. Smartphones, tablets, laptops and televisions are all rendered obsolete in the future portrayed in Privacy.

**A Narrative Experience**

Privacy is a narrative-focused game. Unravel the secrets of the house and story at your own pace. Depending on how deep you dig, Privacy will take between 2 and 5 hours to complete.
